SUBJECT: INTELLECTUAL PROPERTY

PETROPHYSICS Pty Ltd training courses have been developed, maintained and presented by Mark Deakin since January 1990. These courses represent a PhD in petrophysics, 25 years experience as a technical expert, continual research in petrophysics and a total of approximately seven man-years developing, writing and maintaining these courses.

Electronic versions of manuals are created solely to expedite the production of paper copies and serve no other function whatsoever. A written agreement to permanently delete all electronic copies is a necessary prerequisite for manual reproduction. This is intended to avoid Intellectual Property becoming "shareware". The Permanent File Delete Pledge has been agreed by every company in receipt of electronic files, from small consulting firms to large multi-nationals.

Free copying of useful information results in countless persons obtaining free copies of the information in this case benefiting from the years of work and expertise represented by these courses at no cost, with no benefit flowing to the author. This is an injustice. The Terms & Conditions and Process which embody this policy are published at www.petrophysics.net/inhouse.htm. This page is the first point of contact for those interested in hosting courses and has been published and available for scrutiny since reproduction from electronic files was first introduced, in 2004.

Dr Mark Deakin,
PETROPHYSICS Pty Ltd.
